

Carbon Statement Workshop Series

CRC Energy Efficiency Scheme:

Managing compliance, minimising financial impacts and developing reduction strategies

Key outcomes from attending the workshop include:

- Learn about the latest changes to the scheme and what impact that will have on your participation
- Understand what you need to do to comply with the CRC Energy Efficiency Scheme on an ongoing basis
- Understand the consequences of participation for your organisation including financial implications and reputational risks
- Learn how to calculate your regulated emissions and produce the required reporting
- Learn how to develop an effective reduction strategy and gain internal support for emission reduction projects

CRC Energy Efficiency Scheme:

Managing compliance, financial impacts and developing reduction strategies

Key areas to be covered in the workshop and documentation:

Legislation update:

- Agreed changes since registration
- Structure and timeline

Driving forces:

- Compliance, cost or reputation?

Compliance:

- Importance of data accuracy and sourcing
- Consolidation and consistency
- Calculating CRC emissions – the 90% rule, residual supplies, CCAs and the EU ETS
- Ongoing compliance administration – the footprint, annual report and evidence pack
- Auditing

Cost:

- Payments – how and when
- Budgeting cashflow
- Who should pay?

Reputation:

- How much does it count?
- The league table

Elements of success:

- Organisational accountability
- Having the right tools
- Creating a carbon reduction strategy framework
- Where to focus
- Gaining internal support
- Implementation

Further considerations:

- Changes to your organisational structure
- Mergers and acquisitions, disposals and disaggregation
- Overview of any proposed changes for the next phase
- The future cost of carbon

This course will include interactive group discussion around data capture, emissions calculations, dynamic reporting and emissions reduction.

Duration of course: 1 day

Cost: £595+ VAT
